Jaipur, Rajasthan , India

OBJECTIVE

A driven Full-Stack and Android Developer with a knack for rapid learning and building responsive, impactful solutions. Passionate about blending robust development skills with a growing expertise in data science to create meaningful and innovative applications.

EXPERIENCE

- **Tensax Innovation Lab**  February 2025 - June 2025
Full Stack Developer Jaipur, Rajasthan, India
 - Developed and maintained real-world web and cross-platform applications using Svelte for fast and efficient front-end development
 - Integrated Firebase for authentication, real-time database, and hosting, enabling scalable backend support
 - Utilized AWS services (e.g., S3, Lambda, API, S3) to deploy and manage cloud-based infrastructure for production-ready apps

EDUCATION

- **Vivekananda Global University** 2022 - present
B.Tech in Computer Science Jaipur, Rajasthan
 - GPA: 7.3
- **Marudhar Defence School** 2022
12th Standard Merta City, Rajasthan
 - percentage : 71.60%
- **Raj Public Sec. sc. School** 2020
10th Standard Degana, Rajasthan
 - percentage : 64.60%

PROJECTS

- **GharTak: [Local Delivery Web App]** June 2025
Tools: [SvelteKit, Tailwind CSS, JavaScript, Firebase, REST APIs] 
 - Developed a hyperlocal delivery platform enabling users to order groceries, electronics, household goods, and parcels with real-time tracking and notifications.
 - Built responsive frontend using SvelteKit + Tailwind CSS, ensuring mobile-friendly UI and fast navigation.
 - Implemented Firebase Authentication for secure login/registration of users and delivery partners. REST APIs for Google Maps (delivery tracking) and Razorpay/Stripe (secure payments).
- **Real-Bharat : [The True History of India]** July 2025
Tools: [Android Studio, Java, Firebase, REST API, GitHub, Glide, , RecyclerView, Google Sign-In] 
 - Real-Bharat is a virtual metaverse of India that brings the nation's heritage, culture, and tourism to life through immersive AR/VR experiences. The app allows users to explore historical places, cultural events, and personalities interactively, combining modern technology with rich Indian history.
 - Interactive search functionality with Wikipedia REST API integration to fetch historical facts, images, and summaries. integration for user authentication, search history saving, and personalized experiences.
 - Bottom navigation with dedicated sections: Home, Search, Explore, Profile.

SKILLS

- **Specialized Area:** Full-Stack Web Development, Android Development
- **Programming Languages:** Java, C++, JS
- **Web Technologies:** SvelteKit, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), AWS lambda , Amazon API Gateway , S3 , Amazon DynamoDB
- **Database Systems:** Firebase (Authentication, Firestore, Cloud Messaging, Storage,Sql,MongoDB)
- **BackEnd Technologies:** Node.js , Express.js ,
- **Other Tools & Technologies:** IDEs Editors: VS Code, Android Studio, IntelliJ IDEA, Design Prototyping: Figma, Canva, Adobe XD (UI/UX wireframing mockups), Project Management: GitHub , Capacitor , Tauri.

EXTRACURRICULAR ACTIVITIES AND HOBBIES

Cricket, Badminton.

Track / Gym .
